Dear Hiring Manager,

I am writing to express my interest in the Junior Backend Developer role at Checkmarx. With over 2 years of experience in developing and deploying robust web applications, I bring hands-on expertise in React.js, Node.js, Next.js, and relational databases (PostgreSQL/MySQL), along with a strong commitment to building scalable, maintainable, and user-centric solutions.

In my most recent role, I have:

- Developed and maintained scalable full-stack applications with React.js, Node.js, and Express.js.
- Designed and optimized PostgreSQL/MySQL schemas, improving query performance and system reliability.
- Implemented RESTful APIs with JWT authentication and role-based access control.
- Applied SOLID and DRY principles to ensure clean and maintainable code.
- Collaborated with teams on CI/CD pipelines and agile workflows, ensuring efficient and timely delivery.

Additionally, I have hands-on experience in cloud deployment (AWS, Vercel, Netlify) and have contributed to projects exploring Generative AI-powered features. My technical foundation is complemented by a problem-solving mindset, adaptability, and the ability to work both independently and collaboratively in cross-functional teams.

I am particularly drawn to Checkmarx, because of its forward-thinking approach and focus on cutting-edge technologies like GenAI. I am confident that my technical expertise, combined with my passion for innovation, would make me a valuable addition to your team.

Thank you for considering my application. I would welcome the opportunity to discuss how my skills and experiences align with your team's goals.

Sincerely,

Surya Teja Panduri
